

Engaging Networks' Services

Data in, Data out

OCTOBER, 2019

The Export and Import API

An introductory session to what APIs are under the Engaging Networks' Services (ENS) umbrella.

OCTOBER, 2019

Engaging Networks' Services

The Engaging Networks' Services (ENS) cover three main services, which solve different integration requirements.

Non sensitive / 'Social Proofing' services

Bulk API services

REST services

Data Center : Domain

Toronto, Canada

<https://e-activist.com/...>

Dallas, USA

<https://us.e-activist.com/...>

Icons made by Good Ware from www.flaticon.com

services

Useful in statistics, roll calls and certain non-sensitive aggregate data representations.

As the service does not return any sensitive supporter data, it can be used 'on the page' with JavaScript.

Here is a list of available calls :

<https://e-activist.com/ea-dataservice/services.jsp>

These services are used by our own display widgets

Bulk API services

Designed for :

CRM integrations

Large amounts of constituent updates/creations

Transactional import- Legacy or offline donation representation

CRM Segments- Import 'segments', defined externally, to help clients easily email a group built outside of EN

Bulk API services

URLs used

<https://e-activist.com/ea-dataservice/export.jsp>

<https://e-activist.com/ea-dataservice/import.jsp>

<https://engagingnetworks.support/knowledge-base/bulk-import-api/>

Bulk API services : Export

URLs used

<https://e-activist.com/ea-dataservice/export.jsp>

For Export API, please refer to the '**Transactional Data format**' guide.

This provides an overview of how data is represented.

Call after 12 EDT. Utilize 'check service' and 'Total' response header.

Bulk API services : Import

URLs used

<https://e-activist.com/ea-dataservice/import.jsp>

‘Saved Format’ allows Engaging Networks to know which header field should match to the relevant supporter field.
