## Transaction Mappings

Below are the configurations to how data is represented in Salesforce.

Import

Export

Order	Mapping	Description	Status	
1	Fundraising Single	Process an FCS transaction (Fundraising Credit Single)	Active	
2	Fundraising Recurring	Process an FCR transaction (Fundraising Credit Recurring)	Active	
3	Event Additional Donation	Process the additional donation, made on an event order	Active	
4	Event Ticket Order	Process an ECS order (Event Credit Single)	Active	
5	Create Advocacy CampaignMember	Generate an advocacy CampaignMember, based on transaction type	Install	
6	Update Advocacy CampaignMember	Update an advocacy CampaignMember, based on transaction type	Install	

# Page-Builder smart re-direct

The screenshot shows the 'Conditional Redirect' configuration window in the MSS-FederalElection-2019-EN Page-Builder. The window has a title bar with a close button (X) and a toolbar with icons for settings, preview, search (en-CA), and a 'Done' button. Below the title bar, there are tabs for 'Page 1', 'Page 2', and 'Page 3'. The main content area is titled 'Conditional Redirect' and contains the following fields:

- IF:** A dropdown menu with the value 'a supporter submits the page'.
- WITH:** A dropdown menu with the value 'country' and a text input field with the value 'USA'. Below this, a note states: 'You can also use the = character, to build OR conditions between values.'
- THEN:** A dropdown menu with the value 'Redirect to external URL.' and a text input field with the value 'http:// or https://'.
- Fallback:** A section with a dropdown menu with the value 'country' and a text input field with the value 'empty fallback value to'.

# Email advocacy – sender envelope

New Envelope Sender

X

**messages.forestrycampaigns.org**

To validate correctly, SPF and DKIM will be checked. Updating both will allow outbound mail to appear from your organization and not from Engaging Networks

Prior to validation, the DNS record for `nationalparks.org` must include the following configuration

**SPF:** add or update the TXT record for `nationalparks.org` to include

```
include:_spf.e-activist.com
```

✓ Good news! The required SPF entry has been found on the DNS record. As a final step, we recommend confirming that the global SPF record is valid. Please see [this link](#) for more information.

**DKIM:** create the two following CNAME records for Custom Domain Authentication

`enkey1._domainkey.nationalparks.org` with the value

```
masterkey1.messages.forestrycampaigns.org
```

`enkey2._domainkey.nationalparks.org` with the value

```
masterkey2.messages.forestrycampaigns.org
```

✓ Great! Domain authentication for `nationalparks.org` appears to be set up and ready to be enabled.

**Valid Inbox**

As this domain will be sending out email on behalf of supporters, it is recommended that this domain have working inboxes for the following:

```
postmaster@nationalparks.org  
abuse@nationalparks.org
```

### Content Preview: Coal isn't the finish line

Subject: Coal isn't the finish line: it's the starting point

{user\_data-First Name-Friend},

Did you hear the amazing news? Chubb, the largest insurer of fossil fuels in the US, just moved to no longer insure coal companies. This is HUGE news. Not only for our climate, but for the communities on the ground impacted daily by the climate crisis and direct impacts to our air, water and health.

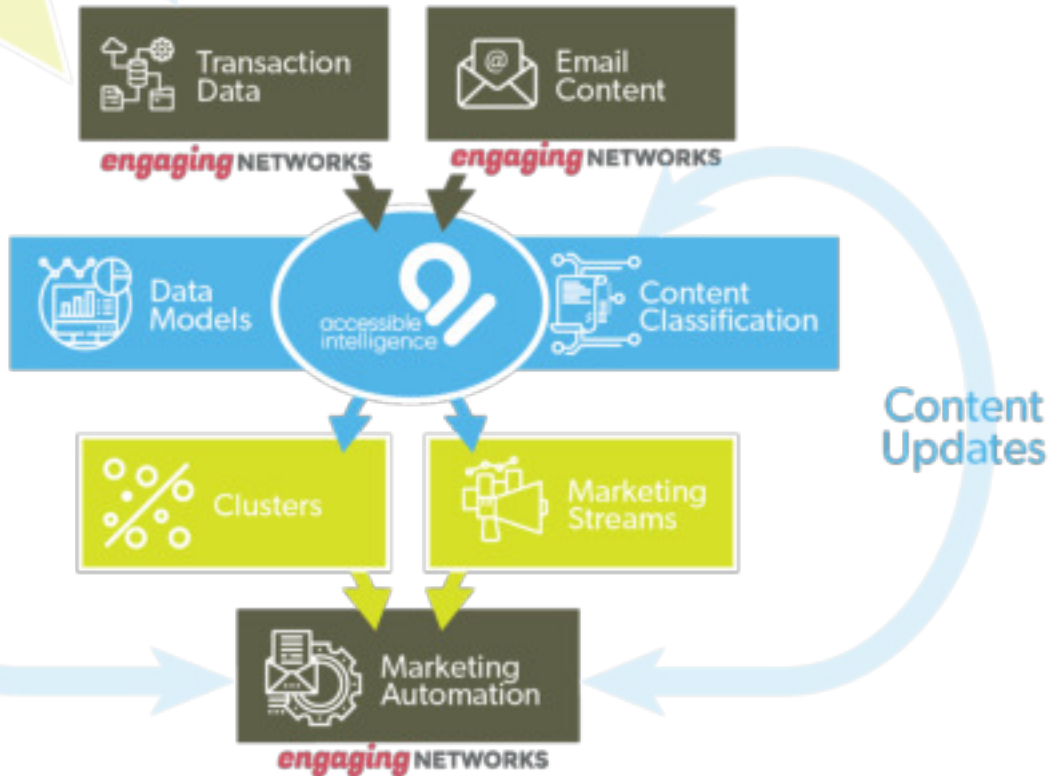

Here's the catch though: while this policy is a major step forward and the first of its kind, **it isn't going far enough**. We're still on borrowed time when it comes to avoiding the worst impacts of climate change, and we need to act swiftly and boldly. While cutting support to coal companies is progress, we still need to stop insuring tar sands projects as well.
